

Customer Shopping Behavior Analysis

1. Project Overview

This project analyzes customer shopping behavior using transactional data from 3,900 purchases across various product categories. The goal is to uncover insights into spending patterns, customer segments, product preferences, and subscription behavior to guide strategic business decisions.

2. Dataset Summary

- Rows: 3,900
- Columns: 18
- Key Features:
 - Customer demographics (Age, Gender, Location, Subscription Status)
 - Purchase details (Item Purchased, Category, Purchase Amount, Season, Size, Color)
 - Shopping behavior (Discount Applied, Promo Code Used, Previous Purchases, Frequency of Purchases, Review Rating, Shipping Type)
- Missing Data: 37 values in Review Rating column

3. Exploratory Data Analysis using Python

We began with data preparation and cleaning in Python:

- **Data Loading:** Imported the dataset. using `pandas`
- **Initial Exploration:** Used `df.info()` to check structure and `describe ()` for summary statistics

- **Missing Data Handling:** Checked for null values and imputed missing values in the **Review Rating** column using the median rating of each product category.
- **Column Standardization:** Renamed columns to snake case for better readability and documentation.
- **Feature Engineering:**
 - Created **age_group** column by binning customer ages.
 - Created **purchase_frequency_days** column from purchase data.
- **Data Consistency Check:** Verified if **discount_applied** and **promo_code_used** were redundant; dropped **promo_code_used**.
- **Database Integration:** Connected Python script to MySQL and loaded the cleaned Data Frame into the database for SQL analysis

4. Data Analysis using SQL (Business Transactions)

We performed structured analysis in MySQL to answer key business questions:

1. **Revenue by Gender** - Compared total revenue generated by male vs. female customers.

	gender	revenue
▶	Male	134364
	Female	63629

- 2. High-Spending Discount Users** - Identified customers who used discounts but still spent above the average purchase amount.

	customer_id	purchase_amount
▶	2	64
	3	73
	4	90
	7	85
	9	97
	12	68
	13	72
	16	81
	20	90
	22	62
	24	88
	32	79
	33	67

customer_behavior 3 ×

- 3. Top 5 Products by Rating** - Found products with the highest average review ratings.

	item_purchased	Average Product Rating
▶	Sandals	3.86
	Gloves	3.85
	Boots	3.84
	Hat	3.8
	Skirt	3.8

4.Shipping Type Comparison - Compared average purchase amounts between Standard and Express shipping.

	shipping_type	round(avg(purchase_amount),2)
▶	Express	61.00
	Standard	58.53

5. Subscribers vs. Non-Subscribers - Compared average spend and total revenue across subscription status.

	subscription_status	total_customers	avg_spend	total_revenue
▶	Yes	899	59.28	53289
	No	2417	59.87	144704

6. Discount-Dependent Products - Identified 5 products with the highest percentage of discounted purchases.

	item_purchased	discount_rate
▶	Sneakers	52.03
	Hoodie	49.22
	Coat	48.95
	Jewelry	48.63
	Hat	48.51

7. Customer Segmentation - Classified customers into New, Returning, and Loyal segments based on purchase history.

	customer_segment	Number of customers
▶	Loyal	2660
	Returning	591
	New	65

8. Top 3 Products per Category - Listed the most purchased products within each category.

	item_rank	category	item_purchased	total_orders
▶	1	Accessories	Jewelry	146
	2	Accessories	Sunglasses	144
	3	Accessories	Scarf	136
	1	Clothing	Shirt	149
	2	Clothing	Pants	146
	3	Clothing	Sweater	142
	1	Footwear	Sandals	133
	2	Footwear	Shoes	126
	3	Footwear	Boots	125
	1	Outerwear	Coat	143
	2	Outerwear	Jacket	134

9. Repeat Buyers & Subscriptions - Checked whether customers with >5 purchases are more likely to subscribe.

	subscription_status	repeat_buyers
▶	Yes	815
	No	2143

10. Revenue by Age Group - Calculated total revenue contribution of each age group.

	age_group	total_revenue
▶	Young Adult	52189
	Middle-Aged	50406
	Senior	47902
	Adult	47496

5. Dashboard in Power BI

Finally, we built an interactive dashboard in Power BI to present insights visually.

6. Business Recommendations

- **Boost Subscriptions** - Promote exclusive benefits for subscribers.
- **Customer Loyalty Programs** - Reward repeat buyers to move them into the "Loyal" segment.
- **Review Discount Policy** - Balance sales boosts with margin control.
- **Product Positioning** - Highlight top-rated and best-selling products in campaigns.
- **Targeted Marketing** - Focus efforts on high-revenue age groups and express-shipping users.
